

QUINTUM ANNOUNCES NEW FEATURES AND PRODUCTS TO SUPPORT THE MICROSOFT UNIFIED COMMUNICATIONS 2007 LAUNCH!

UNIFIED COMMUNICATIONS offers more productivity and reduced costs. But, you need to integrate your current communications infrastructure, which probably contains PBXs, analog devices, FAX machines and many branch office locations to get the most out of your existing network. Now you can **"VoIP AS YOU ARE!"** with Tenor VoIP MultiPath switches and gateways.

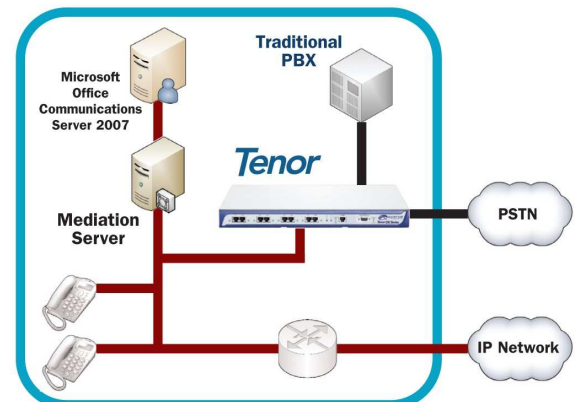

QUINTUM TENORS ARE 'THE PERFECT FIT' FOR MICROSOFT UNIFIED COMMUNICATIONS DEPLOYMENTS

TENOR INTEGRATES MICROSOFT UNIFIED COMMUNICATIONS WITH YOUR EXISTING NETWORK BY MAKING IT EASY TO:

- ◆ Connect your legacy PBX, IP PBX and analog devices
- ◆ Connect FAX and modem-based devices
- ◆ Connect to the PSTN
- ◆ Connect branch offices
- ◆ Connect multiple gateways off one Mediation Server

QUINTUM MAKES IT EVEN EASIER WITH OUR NEW:

- ◆ Unified Communications Proxy
- ◆ New Tenor Hybrid Gateways
- ◆ Customized Configuration Wizard
- ◆ Microsite Dedicated to Microsoft Unified Communications
- ◆ Quintum Total Care Package for Microsoft Unified Communications
- ◆ 7x24x365 Support

Quintum, a Certified Microsoft Partner, has been working closely with Microsoft to assure that customers' deployments of Office Communications Server 2007 and Exchange Server 2007 are easy to implement and integrate with their existing communications networks.

QUINTUM HAS DEVELOPED NEW FEATURES FOR THEIR TENORS:

Tenors are unique in their capabilities to support unified communications with legacy voice networks and IP PBXs.

Unified Communications Proxy (UC Proxy): Quintum Tenors feature a new unique UC Proxy. The UC Proxy enables the Tenor gateway to provide "Any to Any" connectivity, allowing calls to switch from TDM to SIP, SIP to TDM, TDM to TDM and SIP to SIP. This allows Tenor to be integrated into any existing voice network.

Tenor's **UC Proxy** also offers the ability to **deploy multiple gateways off of a Microsoft Mediation Server**, and support connectivity to branch office gateways, including Tenor Survivable Branch Office gateways that provide back up for standard SIP networks.

Customized Configuration Wizard: Quintum is also providing Microsoft customers with a way to simplify their VoIP deployment with Office Communications Server 2007 and Tenor. The wizard will step you through the process to perform a standard configuration with MS OCS2007. This Configuration Wizard is **free** with all Tenors sold for any Office Communications Server 2007 implementation.

QINTUM IS ANNOUNCING NEW LINE OF TENOR HYBRID GATEWAYS:

Quintum will soon release

its new **Tenor Hybrid Gateways**, which integrate Tenor's unique switching intelligence with a Microsoft Mediation Server to simplify deployments of Microsoft unified communications and VoIP, without having to completely replace a legacy telephony networks. Quintum has created a single box solution that eases integration across IP and legacy networks, eliminates the need for a separate mediation server and reduces the total cost of ownership. Available with up to 4 T1/E1/PRI spans to support up to 120 VoIP channels, this new series of gateway is perfect for Microsoft Office Communications Server 2007 deployments!

QINTUM HAS DEDICATED SUPPORT IN PLACE:

Microsite Dedicated to OCS2007: Quintum created a dedicated [Microsoft microsite](#), which links from our home page. This microsite provides information on Quintum's products and how they function within a Unified Communications environment. Read our [case study](#) on how one consultancy deployed Tenors with Microsoft OCS 2007 and Exchange Server 2007, and enabled its consultants to overcome the constraints of space and time. Plan-B's state-of-the-art communications environment has significantly boosted staff productivity while helping the company save thousands in telecommunications costs. Everything you need to know is right here! And, look for a new announcement on this site soon!

TOTAL CARE PACKAGE: Quintum put together a **one price/one year** customer support package that includes everything from remote installation to Advanced Warranty Replacement. For one price, we will assist you with pre-network design to assure easy integration of Tenor with the MS Mediation Server, the PSTN, existing PBXs and any analog devices, including FAX machines. We will perform Remote Installation which will be closed only when the installing engineers have verified that Tenor successfully operates with the OCS Mediation Server, PSTN and all attached devices. You will have 7x24 access to our engineers and Advanced Warranty Replacement, if needed for one full year!

Special Installation Services: Until December 31st, 2007, Quintum is offering resellers free installation services valued at over \$650 per Tenor with our Remote Management Session Server, for customer installations.

Dedicated Support: Quintum has committed itself to developing Microsoft-specific support processes, and has a dedicated team of customer service engineers who are available to provide 7x24 support to assist customers deploying Microsoft OCS2007. We also have a dedicated email account for [Customer Support](#).

QINTUM HAS THE PRODUCTS, THE SERVICES AND THE EXPERTISE YOU NEED TO SUPPORT YOUR MICROSOFT UNIFIED COMMUNICATIONS INITIATIVE!
